

Protecting Maine's Environment.

At Poland Spring, our business depends on Maine's abundant and renewable groundwater resources. But that's not the only reason we're committed to preserving Maine's environment. It's also because Maine is home to our nearly 800 full-time and seasonal employees from 125 local communities.

At all of our Poland Spring facilities, meters are installed to ensure that water resources remain within sustainable levels and the local environment is protected. We have nothing to gain and everything to lose from overusing water. In fact, Poland Spring was recognized this year as an Environmental Leader by the Maine Department of Environmental Protection.

Our responsible stewardship allows Poland Spring to continue to invest and support good jobs right here in Maine.
